INSURANCE SOCIETY

"Still achieving, still pursuing,
Learn to labour and to wait."

VOL. I., No. 1.
OFFICE: 162 St. James St.

MONTREAL, JANUARY 15, 1881.

SUBSCRIPTION:
\$1.50 PER ANNUM.

THE aim of the establishment of this journal is to afford information on matters affecting Insurance and Insurance Society, to offer a means of amicable discussion on the various practical methods of ameliorating troubles, to assist in the introduction of a more rational, more systematic, and more profitable means of conducting business, to disseminate proper views with regard to Insurance, and to advance a general cordiality of feeling and unanimity of purpose among the profession of underwriters.

In plain English, the promoter's motive is that he believes that, by inducing as far as possible a friendly feeling among those who must necessarily become associated in a common interest, he can work his way to success in his various enterprises, and at the same time conduce materially to a more satisfactory state of affairs than now rules.

Five years ago, he made propositions for the commencement of surveys for a system of Block Plans. Gratuitous advice was offered to him by nearly all, not to waste his time and money, as Companies never would unite to help anything of the kind. However, some generous spirits were induced to subscribe a portion of the cost of the first survey, and gradually, not without many snubs and much apathy, the system has grown, the present result being a series of plans, of which a list will be found on our fourth page.

This system, though now established, has to be kept in an efficient state of repair, else it soon will become valueless. Changes and improvements are being made daily, in the construction of villages, towns and cities, in the character of the buildings and business, in the material prosperity of each place, and in the means of protection against fire. Insurance men of all classes must, or rather should, keep themselves posted in these matters, and as personal observation is impossible, the facts and conditions of such changes must be gathered for them.

Here we offer a means of mutual interchange of information and of views. The Dominion of Canada is large enough, wealthy enough, and should be possessed of sufficient education and spirit to support such a journal, and a fair trial is being made in the manner now laid before you. We commence in a modest way, and with ample room to increase the number of pages per month, as you furnish acceptable matter to fill them.

It is trusted that some reliable gentleman, well versed in insurance matters, and possessed of ability, industry and popularity, will come forward to take an active part in the management of INSURANCE SOCIETY, as the promoter has no present idea of being able to spare sufficient time to comply with the demands of what will be involved in the practical working of this journal.

The main features proposed to be adopted in this journal are:—

1. To be a means of increasing cordiality and harmonious co-operation among Insurance Companies.
2. To disseminate correct views on insurance matters—both to the profession and to the public.
3. To afford a means for friendly discussion on topics of mutual interest.

4. To gather information in a concise manner of the progress of improvement in fire protection in cities, towns and villages.

5. To urge on municipal corporations the necessity of providing proper protective appliances, and to offer suggestions and to invite criticism on such subjects.

6. To record fires in a tabulated form, to afford easy future reference.

7. To afford means for publishing the benefits of Life Insurance, Accident Insurance, and Guarantee Insurance.

This number is issued to all Directors, Managers and Agents of Insurance Companies—to Mayors and to Chiefs of Fire Departments in the various cities and towns of the Dominion, so far as their names are known to us. We invite offers from those in each place who will be willing to furnish particulars of fires occurring in their vicinity, and also of matters pertaining to improvements or proposed improvements in facilities for fire extinguishment. In return for such, if sent regularly before 5th of each month (to be in time for insertion), we will as regularly forward a copy of INSURANCE SOCIETY on the 15th.

The subscription price is \$1.50 per annum, postage prepaid. As the subscription roll increases in number, so will the number of pages in each issue increase. We trust that the interest taken will be sufficient to warrant continuance, and to this end we ask your pecuniary aid and your literary help, the expectation being that the insurance community will mutually assist this journal.

Comment and correspondence are invited, the only stipulation being that such be concisely written, temperate in language, of general interest, to the point, and bearing the name and address of the author, not necessarily for publication, but as a guarantee of good faith.

Communications to be addressed:

CHAS E. GOAD, 162 St. James Street, Montreal.

HINTS ON SAFETY AND PROFITS.

The *Cincinnati Price Current* says:—

"The average underwriter seems to think of but one way to get out of the trouble now involving the insurance business, and that is to advance the rates. That is not the road to safety. Reduce the number of fires by requiring proper means for their prevention and extinguishment. Reduce incendiarism by refusing to insure any man who is not known to be honest and honorable. Reduce expenses by reducing commission to honest and competent men, and positively refuse to accept business from incompetents and insurance tramps, who, as a rule, have only such risks as good men refuse. By making these reductions, profits may be increased, and the business put on a sound and respectable basis."

It is all but universally admitted that in Canada there is no present hope of a reasonable and practicable union among companies for the proper and equitable adjustment of rates; the only feasible method of ensuring a profitable result is for each to obtain every possible information respecting the status, physical and moral, of each risk, and by the managers' intelligence aided by inspectors' and agents' advice and by every economical independent idea of the true value of the hazard—to be able to decide the lowest paying rate in that special case, and to decline the risk if such cannot be obtained.

FIRES IN CANADA DURING THE MONTH OF DECEMBER, 1880—CONTINUED.

We can clearly see that this is the tendency of all successful companies now; and to aid this, we claim that the introduction and *proper working* of the Block Plan system is indispensable, aided as it is proposed to be by a sister enterprise that will furnish Reference Books showing occupations, owners, values and comparative ratings from an independent source.

To these systems this journal is proposed as a means of additional help—to periodically note errors—and to obtain improvements in the practical working of these labor saving appliances.

DO PLANS PAY?

Ask this question of those Managers and General Agents who have systematically used Block Plans, in so far as they have been able to obtain them; such managers, we regret, being few at present, though their number is steadily increasing "as the years roll on."

Ask them two questions:—

1. Do you know of any special instance, in which, by the use of Block Plans you have avoided a loss which you would have incurred had you not possessed and *used* these Plans; this apart from their general benefit for constant reference?

2. In towns of which you have had no plans written up have you incurred losses in any special case, where, from subsequent knowledge, you believe that reliable *used* plans would have lessened the loss?

After due consideration, the answer comes—Yes, in one or two special instances we saved (or would have saved) more than the whole cost of a complete set of Plans.

This is outside of the generally acknowledged utility of such conveniences in agents' reports, re-insurance matters, etc.

And still there are those who work their territory by "intuition" and say that to them such aids are "perfectly unnecessary."

Figures refute the "intuition" theory; of the 37 Companies transacting a Fire Insurance business in commercial centres in Canada, 16 support the Plan system to a greater or less degree, 11 take a few plans now and again, 10 give no support.

From the Dominion and Provincial Insurance Superintendents' Reports, the ratio of Losses and Expenses to Premium Receipts (adding 10% for Foreign Head Office Expenses) are:

16 supporters,	Losses 61%	Expenses 31.55
11 some plans,	" 75%	" 32.25
10 none	" 92%	" 35.40

Were we to divide up the 16, of whom some are rather apathetic supporters, the inference in favor of plans would be still stronger—but the above will show that the support of the Plan system has *not increased expense ratio*, and may fairly claim to at least *assist to lessen loss ratio*.

Ask active agents whether they would return to the old system of "making constant repetition of diagrams"—ask them if the Block Plans are not a wondrous help in dealing with insurers, and whether they do not assist them in explaining the bearings of a question to Head Office; they will readily acquiesce in all encomiums, and will wonder that they ever imagined (as many did in former days) that the only use of a plan was, to be "a check on the agent."

WANTED.—The services of a gentleman of some experience in Fire Insurance matters, to actively assist in the management of this journal, and in other enterprises connected with special surveys, etc. Communications received by letter to CHAS. E. GOAD, Civil Engineer, 162 St. James St., Montreal.

The following list of fires occurring in Canada in December last, is compiled from the daily papers—and of course is gathered from telegrams hastily despatched immediately after the occurrence, hence the information is generally defective and often erroneous—however, it will serve to show the general idea of the scheme, and with your cordial co-operation, we may, ere long, be able to ensure a passably reliable record for future reference:—
